

THE MONEYSHOT

An in your face comedy

A film by Phillip Darlington

A blacklisted
cinematographer
gets pulled by
his high school
friend into the
early-2000s
porn boom and
learns that
easy money
never stays
easy.

THE MONEYSHOT

Journey into the Other Hollywood...

SCOTT:
Skilled
Ethical
Idealist

PAUL:
Money
Addiction
Opportunistic

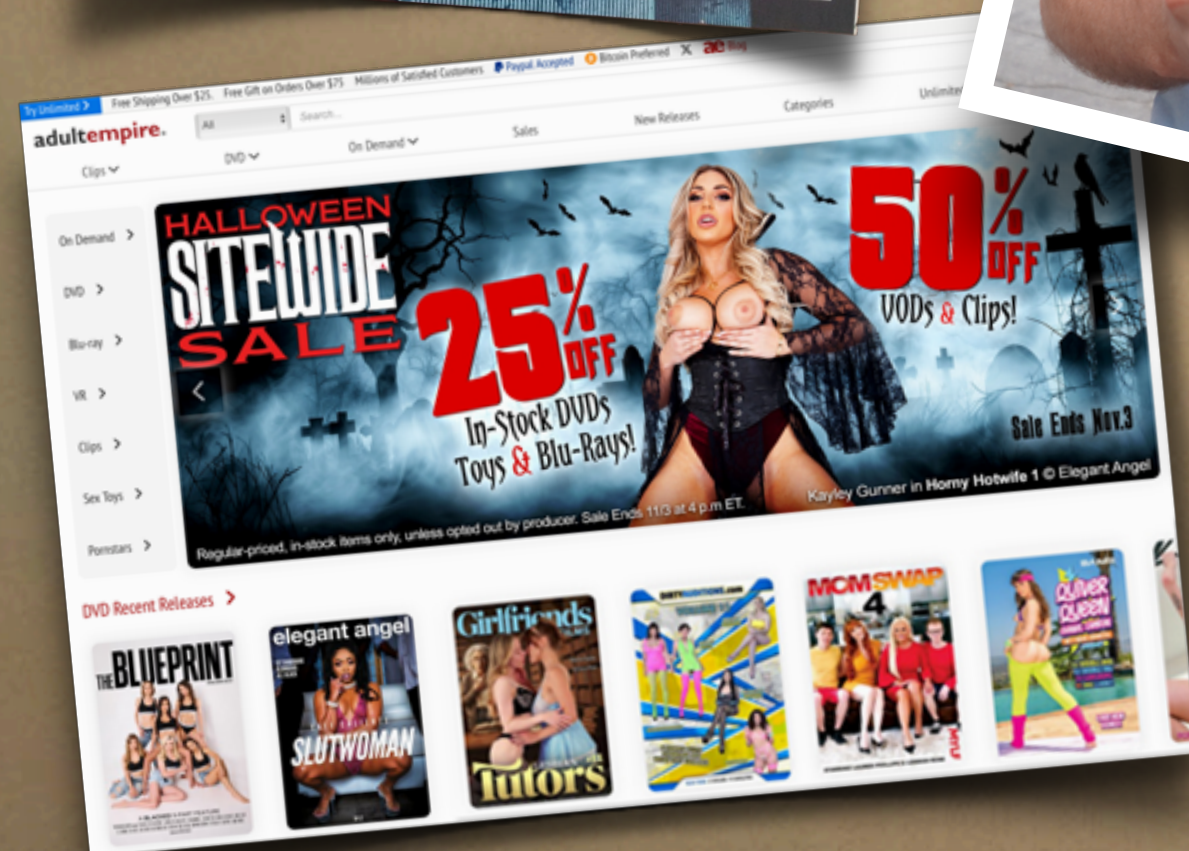

Based on true events

THE MONEYSHOT

The World in 2005...

Post-9/11 America. The internet is booming after the dot-com crash. DVDs reign. It's the wild west of online monetization - a perfect storm for their venture.

THE MONEYSHOT

BOOGIE NIGHTS meets NIGHT SHIFT

- immersive,
dramatic descent
into a seedy
business

- yet, lighter, more
sardonic "two guys
stumble into this
world" energy

THE MONEYSHOT

The Set-up

After consulting veteran producer Dick Romaine (Jim Hanks), Scott and Paul nail their first successful shoot.

With Paul's capital, they go all-in on "F-University" - a series about college admins teaching wannabe porn actors the craft.

THE MONEYSHOT

The Complication

Scott documents their business while Paul exploits the talent. Money flows. Cocaine follows. Paul spirals into obsession while Scott meets Dawn, a 24-year-old computer store smarty, who represents everything he thought he'd lost.

The Descent

Paul's drug use escalates. His sexual exploits mirror addiction. Scott's rescue efforts create unbearable tension - Paul accuses him of destroying their business model.

The Resolution

Paul loses everything, broken by the experience. Dick remains neutral - he saw it coming. Scott finds redemption, moral value and falls in love. He finds redemption not by escaping his past, but by protecting others from repeating it.
